

□ Final Animation Project Rubric — Game Lab (Lessons 1–10)

Goal: Create an original animation, school appropriate, that demonstrates understanding of key programming concepts from the unit.

Category	Criteria	Points
Creativity & Effort	Project shows original effort and includes a clear theme or story	10
Use of Programming Concepts	Project includes at least 8 of the following concepts : Sprite creationSprite properties (e.g., scale, rotation, visibility)Sprite animation (e.g., <code>sprite.setAnimation()</code>)Coordinate placement (<code>x, y</code>)Use of <code>draw()</code> loopBackground changes (color or scene)Conditional statements (if/else)Movement (manual or automated)Layering (e.g., <code>sprite.depth</code>)Sprite groups or multiple sprites	5
Code Organization	Code is cleanly formatted, readable, and logically ordered	5
Comments	Includes comments explaining key parts of the code (e.g., what each section does)	5
Animation Quality	Smooth animation, sprites behave as expected, no major bugs	5
Visual Design	Sprites, background, and transitions show attention to detail and visual appeal	5
Bonus (Optional)	Lessons 9 & 10 concepts, like sprite interactions, scene transitions, with conditionals	+5
